# Welcome

Welcome to our Senior Executive Military programmes portfolio, designed specifically for senior military officers either looking to connect with contemporary military leadership doctrine or transition into executive leadership roles in the corporate world. We understand the skills and competencies required for successful military leadership. We believe these skills and competencies are highly transferable to the business world, and our programmes are tailored to help you develop and leverage your military skills to achieve your full potential in your military career and even beyond your military career.

Our programmes are designed to help you strengthen your capability, provide you with the right vocabulary broadening your knowledge base, and enhance your commercial acumen. We understand that executive leadership roles require a unique set of competencies and capabilities, and our programmes are designed to help you build and enhance them through a combination of immersive workshops, simulation based interactive scenarios and established andragogical curriculum.

Our team of experienced faculty members, with a wealth of expertise in both military and corporate leadership, are dedicated to helping you achieve your goals and equip you with the leadership acts and activities you need to succeed in your future career. Our programmes are highly interactive, and provide you with the opportunity to learn from other like-minded professionals, network with industry experts, and develop valuable relationships that will benefit you throughout your career.

Whether you are looking to transition into a corporate leadership role or continue with your successful military trajectory, our Senior Executive Military programmes portfolio will help you prepare for the challenges ahead and enable you to achieve your full potential. We look forward to welcoming you to our programmes and supporting you on your journey towards executive leadership success.

# Leadership Doctrine

The Leadership Doctrine course is designed to equip senior military officers with the knowledge and skills required to lead effectively in a rapidly changing global environment. The course will cover a range of topics, including the principles of leadership, the role of leaders in shaping organizational culture, and the importance of developing and implementing effective strategies.

Participants will have the opportunity to engage in interactive discussions and case studies, and to learn from experienced faculty members with a wealth of expertise in military and corporate leadership. The course will also provide a valuable opportunity for participants to network with other senior military officers and to build relationships that will benefit them throughout their careers.

Overall, the Leadership Doctrine course is an essential component of our Senior Executive Military programmes portfolio, and will provide participants with the tools and knowledge they need to lead effectively in both military and corporate environments.

## Who Should Attend

This course is ideal for senior military officers who are either interested in transitioning into executive leadership roles in the corporate world, or who are looking to broaden their knowledge base and network with other like-minded professionals.

The course is also suitable for military officers who are looking to enhance their leadership skills within the military context, and who are interested in learning best practices and strategies for leading effectively in a rapidly changing global environment.

Overall, the Leadership Doctrine course is ideal for senior military officers who are looking to take their leadership skills to the next level and achieve their full potential in their careers.

## Learning Outcomes

- **Develop a deep understanding of leadership principles:** Participants will gain a comprehensive understanding of the core principles of leadership, including the importance of integrity, vision, and effective communication. They will also learn how to lead with authenticity and build trust with their teams.
- **Learn to navigate complex organisational cultures:** Participants will learn how to navigate complex organizational cultures and develop strategies for shaping culture in their own organizations. They will also gain insight into the importance of cultural awareness when working with diverse teams and stakeholders.
- **Develop strategic thinking and planning skills:** Participants will learn how to think strategically and develop plans that align with their organisation's goals and objectives. They will also gain insight into the importance of risk management and contingency planning in complex and uncertain environments.
- **Build effective teams:** Participants will learn how to build and lead effective teams, including strategies for talent management, delegation, and performance management. They will also gain insight into the importance of diversity and inclusion in building high-performing teams.
- **Develop a global mindset:** Participants will gain a global perspective on leadership and learn how to lead effectively in a rapidly changing global environment. They will also gain insight into the importance of cross-cultural communication and collaboration in building successful partnerships and achieving organizational goals.

# Future Context of Defence ^v

## Overview:

This course explores the future landscape of defence and equips senior military officers with the knowledge and skills needed to navigate emerging threats and opportunities. Participants will learn about emerging technologies, cybersecurity, geopolitical trends, and innovation in defence.

## Key Topics ^v

- Emerging Technologies
- Cybersecurity
- Geopolitical Trends
- Innovation in Defence

## Learning Outcomes ^v

- Understand the impact of emerging technologies on defence
- Develop strategies to counter cybersecurity threats
- Analyse and anticipate geopolitical trends
- Foster innovation within defence operations

## Course Content ^v

### Participants will learn to:

- Stay ahead of technological advancements and understand their implications for defence operations.
- Develop comprehensive cybersecurity strategies to protect defence infrastructure and operations.
- Analyse current and future geopolitical trends to anticipate and prepare for potential conflicts and alliances.
- Implement innovative approaches to enhance defence capabilities and operations.

## Who Should Attend ^v

This course is designed for defence analysts, technology officers, and strategic planners who are seeking to stay informed about future challenges and opportunities in defence. Participants should have a background in military operations, strategic planning, or technology, and a keen interest in understanding the future context of defence.

## Programme Benefits ^v

- Equip participants with the foresight to anticipate future defence challenges
- Develop proactive strategies to address emerging threats
- Foster a culture of innovation and adaptability within defence organizations

# Women in Defence Programme ^v

## Overview:

The Women in Defence Programme is designed to empower and support women in the defence sector. This course focuses on leadership development, gender diversity and inclusion, mentorship, and overcoming barriers within the military environment.

## Key Topics ^v

- Gender Diversity and Inclusion
- Leadership Development for Women
- Mentorship and Networking
- Overcoming Barriers in Defence

## Learning Outcomes ^v

- Promote gender diversity and inclusion within defence
- Develop leadership skills tailored for women in defence
- Build strong mentorship and networking connections
- Identify and overcome barriers faced by women in the military

## Course Content ^v

### Participants will learn to:

- Understand and advocate for gender diversity and inclusion in defence settings.
- Develop and enhance leadership skills specific to the challenges and opportunities for women in the military.
- Build and leverage mentorship and networking opportunities to support career growth and development.
- Recognize and address barriers that women face in defence roles, and develop strategies to overcome them.

## Who Should Attend ^v

This course is designed for female defence personnel, aspiring female leaders, and diversity officers who are committed to fostering an inclusive environment in the military. Participants should have an interest in leadership development and a desire to enhance their career progression within the defence sector.

## Programme Benefits ^v

- Equip participants with the skills to promote gender diversity and inclusion
- Empower female leaders within the defence sector
- Enhance mentorship and networking opportunities
- Increase retention and career advancement of women in defence

## Defence Alignment Programme

### Overview:

The Defence Alignment Programme is designed to help senior military leaders align defence strategies with national policies and international standards. This course covers strategic defence planning, policy implementation, international defence relations, and interagency collaboration.

### Key Topics

- Strategic Defence Planning
- Policy Implementation
- International Defence Relations
- Interagency Collaboration

### Learning Outcomes

- Align defence strategies with national and international policies
- Enhance policy execution capabilities
- Foster international cooperation
- Strengthen interagency collaboration

## Course Content

### Participants will learn to:

- Develop and execute strategic defence plans that align with national and international objectives.
- Implement defence policies effectively and ensure compliance with international standards.
- Build and maintain strong relationships with international defence partners and organizations.
- Collaborate effectively with various agencies to achieve cohesive and efficient defence operations.

## Who Should Attend

This course is designed for policy makers, strategic planners, and international relations officers who aim to improve the alignment of defence strategies with broader national and international policies. Participants should have experience in defence planning or policy implementation and a desire to enhance their collaborative and strategic skills.

## Programme Benefits

- Equip participants with the skills to align defence strategies with national goals and international standards
- Improve policy implementation and execution
- Foster stronger international partnerships
- Enhance interagency collaboration for more effective defence operations

# System Leadership Programme ^v

## Overview:

The System Leadership Programme equips senior military leaders with the skills and knowledge to effectively manage and integrate complex defence systems. This course covers systems thinking, organizational dynamics, change management, and the integration of diverse defence components.

## Key Topics ^v

- Systems Thinking
- Organizational Dynamics
- Change Management
- Integration of Defence Systems

## Learning Outcomes ^v

- Understand and apply systems thinking to defence operations
- Navigate and influence organizational dynamics
- Lead and manage change within military organizations
- Integrate diverse defence systems for cohesive operations

# Course Content ^v

## Participants will learn to:

- Apply systems thinking principles to improve the efficiency and effectiveness of defence operations.
- Analyse and influence organizational dynamics to foster a positive and productive environment.
- Develop and implement change management strategies to ensure smooth transitions and adaptability.
- Integrate various defence systems and components to achieve seamless and cohesive operations.

## Who Should Attend ^v

This course is designed for senior leaders, systems engineers, and project managers who are responsible for overseeing complex defence systems and operations. Participants should have experience in leadership or systems management and a commitment to enhancing their ability to lead and integrate diverse defence components.

## Programme Benefits ^v

- Equip participants with advanced systems thinking and management skills
- Improve organizational performance and dynamics
- Enhance ability to lead and manage change
- Achieve efficient integration of diverse defence systems

## Military Procurement

This course is designed to provide senior military officers with an understanding of the processes involved in the procurement of military equipment and technology. Participants will learn about the various stages of procurement, from identifying the need for new equipment, to researching and selecting suppliers, to negotiating contracts and overseeing delivery. The course will also cover topics such as budgeting, risk management, and legal considerations in procurement. Through case studies and interactive exercises, participants will develop skills in decision-making, strategic planning, and stakeholder management in the context of military procurement.

## Who Should Attend

This course is designed for senior military officers who are responsible for managing and overseeing procurement processes and contracts within the military. It is ideal for those who want to deepen their knowledge and understanding of the procurement process, and gain insights into the best practices and strategies for effective procurement in the military.

## Learning Outcomes

- Understand the key principles of military procurement, including budgeting, sourcing, contract negotiation, and risk management.
- Evaluate the strengths and weaknesses of different procurement strategies, including sole-source contracting, competitive bidding, and public-private partnerships.
- Analyse the impact of government regulations and policies on military procurement decisions, and assess the risks and opportunities associated with compliance.
- Develop effective communication and negotiation skills for engaging with suppliers, stakeholders, and other procurement professionals.
- Apply critical thinking and problem-solving skills to real-world procurement challenges, and develop creative solutions that balance cost, quality, and operational requirements.

# Transformational Strategy

The Transformational Strategy course is designed to provide participants with the knowledge and skills required to develop and implement transformational strategies that can drive organisational change and growth. Participants will learn how to develop a strategic vision and translate that vision into actionable goals and objectives.

Throughout the course, participants will engage in interactive discussions and case studies, and will learn from experienced faculty members with a wealth of expertise in military and corporate leadership. They will also have the opportunity to network with other senior military officers and build relationships that will benefit them throughout their careers.

Upon completing the Transformational Strategy course, participants will be equipped with the skills and knowledge needed to lead strategic change within their organisations. They will be able to identify opportunities for growth and innovation, and develop strategies that can drive long-term success.

## Learning Outcomes

- **Develop a comprehensive understanding of strategic thinking:** Participants will gain a deep understanding of the core principles of strategic thinking, including how to develop a strategic vision, identify opportunities for growth and innovation, and translate that vision into actionable goals and objectives.
- **Learn to drive organisational change:** Participants will learn how to develop and implement transformational strategies that can drive organizational change and growth. They will also gain insight into the importance of change management and stakeholder engagement in successfully implementing transformational strategies.
- **Build advanced strategic planning skills:** Participants will develop advanced strategic planning skills, including how to conduct a comprehensive analysis of their organisation's internal and external environment, develop strategic plans that align with organisational goals and objectives, and monitor and evaluate the effectiveness of those plans.

## Who Should Attend

This course is designed for senior military officers who are interested in developing their strategic thinking and planning skills. It is ideal for those who are looking to take their leadership skills to the next level and are interested in driving organisational change and growth.

The course is also suitable for military officers who are interested in transitioning into executive leadership roles in the corporate world, as well as those who are looking to broaden their knowledge base and network with other like-minded professionals.

Participants will gain the skills and knowledge needed to develop and implement transformational strategies that can drive long-term success and growth.

- **Develop leadership skills for driving strategic change:** Participants will learn how to lead teams through periods of strategic change and uncertainty, including how to communicate effectively with stakeholders, manage resistance to change, and build a culture of innovation and continuous improvement.
- **Gain insight into global trends and their impact on strategy:** Participants will gain insight into global trends and their impact on strategy, including emerging technologies, demographic shifts, and geopolitical developments. They will also learn how to develop strategies that can effectively navigate these trends and capitalize on emerging opportunities.

# National Security and Emerging Global Trends ^v

This course is designed to provide participants with a deep understanding of the current global security landscape, including emerging global trends that are likely to shape the future of national security. Participants will learn about the key drivers of change, including demographic shifts, technological advances, and geopolitical developments, and how these trends are likely to impact national security in the coming years.

Throughout the course, participants will engage in interactive discussions and case studies, and will learn from experienced faculty members with a wealth of expertise in military and security affairs. They will also have the opportunity to network with other senior military officers and build relationships that will benefit them throughout their careers.

Upon completing the National Security and Emerging Global Trends course, participants will be equipped with the skills and knowledge needed to understand the complex global security landscape and develop strategies to address emerging threats. They will be able to identify key risks and opportunities, and develop effective strategies to enhance national security in a rapidly changing world. Overall, this course is an essential component of our Senior Executive Military programmes portfolio and is ideal for military officers who are looking to enhance their strategic thinking and planning skills within the national security context.

## Who Should Attend ^v

This course is ideal for senior military officers who are responsible for national security policy, planning, and operations. The course is also suitable for other senior leaders within the military and government who are responsible for national security, including civilian officials and diplomats.

In addition, the course is relevant for executives and professionals from the private sector who have a keen interest in national security and want to broaden their knowledge and understanding of the global security landscape. These may include leaders from industries such as technology, finance, and energy who are looking to better understand the risks and opportunities posed by emerging security threats.

## Learning Outcomes ^v

- **Develop a comprehensive understanding of the global security landscape:** Participants will gain a deep understanding of the current global security landscape, including emerging trends and drivers of change that are likely to shape the future of national security.
- **Gain insight into emerging security threats:** Participants will learn about emerging security threats, including cyber warfare, terrorism, and the proliferation of weapons of mass destruction. They will also learn about the challenges posed by emerging technologies, such as artificial intelligence and quantum computing, and the potential risks they pose to national security.
- **Develop strategic thinking and planning skills:** Participants will develop their strategic thinking and planning skills within the national security context. They will learn how to conduct comprehensive analyses of the security landscape, develop strategies to address emerging threats, and build resilience to withstand potential crises.
- **Learn about international cooperation and collaboration:** Participants will gain insight into the importance of international cooperation and collaboration in addressing global security challenges. They will learn about the role of international organizations, such as the United Nations and NATO, in promoting global security, and how to build effective partnerships with other nations and stakeholders.
- **Develop leadership skills for driving national security:** Participants will develop their leadership skills, including how to communicate effectively with stakeholders, build effective teams, and lead in times of crisis. They will also learn about the importance of ethical leadership and how to build a culture of excellence and continuous improvement within their organizations.

Overall, the National Security and Emerging Global Trends course is designed for individuals who are committed to enhancing their understanding of the global security landscape and developing the skills and knowledge needed to drive effective national security strategies.

# Contemporary Approaches to Strategy in the Digital Landscape

This course is designed for senior military officers who want to develop their understanding of the evolving digital landscape and its impact on strategy. The course will cover key topics such as digital transformation, cyber security, and the use of emerging technologies in military operations.

Participants will gain insight into contemporary approaches to strategy in the digital age, including how to leverage technology to enhance military effectiveness, improve decision-making, and drive innovation. They will also learn about the challenges posed by the digital landscape, including cyber security risks, ethical concerns, and the need to adapt to rapid technological change.

Throughout the course, participants will engage in interactive discussions, case studies, and practical exercises designed to develop their critical thinking, problem-solving, and decision-making skills within the digital landscape. They will also have the opportunity to network with other senior military officers and professionals from the private sector, gaining valuable insights and perspectives from a range of industries and backgrounds.

Overall, this course is designed to equip senior military officers with the knowledge and skills they need to navigate the digital landscape and leverage technology to achieve their strategic objectives.

## Who Should Attend

This course is designed for senior military officers who are responsible for strategic planning and decision-making within a military context. This may include officers from a range of branches, including the army, navy, air force, and other defence agencies.

In addition, the course may also be relevant for executives and professionals from the private sector who are looking to better understand the impact of the digital landscape on strategic decision-making, particularly in industries such as technology, finance, and energy.

Overall, the course is designed for individuals who are committed to enhancing their understanding of the digital landscape and developing the skills and knowledge needed to drive effective digital strategies within a military context. Participants should have a strong interest in emerging technologies and their impact on military operations, as well as a desire to develop their critical thinking, problem-solving, and decision-making skills.

## Learning Outcomes

- Develop an understanding of the digital landscape and its impact on military strategy, including the opportunities and challenges posed by emerging technologies.
- Gain insight into contemporary approaches to strategy in the digital age, including how to leverage technology to enhance military effectiveness, improve decision-making, and drive innovation.
- Enhance critical thinking, problem-solving, and decision-making skills within the context of the digital landscape, including the ability to identify and manage cybersecurity risks and ethical concerns.
- Build a network of contacts across a range of industries and backgrounds, including other senior military officers and professionals from the private sector, to gain valuable insights and perspectives on digital strategy.
- Develop a practical understanding of how to implement digital strategies within a military context, including the use of emerging technologies in military operations, digital transformation, and data analytics.

## Managing Security in Original Context

The Managing Security in Original Context course is designed for senior military officers who are responsible for managing security in complex and challenging environments. The course will cover key topics such as counterinsurgency, counterterrorism, and peacekeeping operations.

Participants will gain insight into contemporary approaches to managing security in original contexts, including how to assess threats, develop effective strategies, and implement operational plans. They will also learn about the challenges posed by asymmetric warfare, including the need to engage with local communities, build trust, and maintain legitimacy.

Throughout the course, participants will engage in interactive discussions, case studies, and practical exercises designed to develop their critical thinking, problem-solving, and decision-making skills within the context of managing security in original contexts. They will also have the opportunity to learn from experienced military leaders and security experts, gaining valuable insights and perspectives from a range of backgrounds and experiences.

Overall, this course is designed to equip senior military officers with the knowledge and skills they need to manage security in complex and challenging environments, including asymmetric warfare, counterinsurgency, and peacekeeping operations.

## Who Should Attend

This course is designed for senior military officers who are responsible for managing security in complex and challenging environments. This may include officers who are involved in counterinsurgency, counterterrorism, or peacekeeping operations, or who work in other contexts where security threats are high and the operating environment is unpredictable. Additionally, the course may be relevant for security professionals from government agencies, law enforcement, and private sector organizations who operate in similar environments.

## Learning Outcomes

- Develop an understanding of the principles of counterinsurgency and counterterrorism operations, including the key factors that contribute to success or failure in these environments.
- Learn how to assess security threats in original contexts, including how to gather intelligence, identify key stakeholders, and analyse the political, social, and economic factors that may contribute to instability.
- Gain insight into the challenges of managing security in original contexts, including the need to build trust, engage with local communities, and balance the use of force with other tactics such as diplomacy and development.
- Develop practical skills in strategic planning, operational design, and implementation of security plans in original contexts, including how to evaluate the effectiveness of these plans and adjust them as needed.
- Understand the role of leadership in managing security in original contexts, including how to build and lead teams, manage risk, and maintain morale and motivation in challenging environments.

# Command, Responsibility, Legal, and Ethical frameworks

This course is designed to help senior military officers develop a deep understanding of the legal and ethical considerations that underpin military operations. Participants will explore the legal frameworks that govern the use of force, including international humanitarian law, human rights law, and domestic law, and examine the ethical principles that guide military decision-making. The course will also address the responsibilities of military commanders in ensuring compliance with legal and ethical standards, including the duty to protect civilians and the duty to ensure the well-being of subordinates. Through case studies and simulations, participants will have the opportunity to apply their learning to real-world scenarios and develop practical skills in decision-making and leadership in complex and challenging environments.

## Who Should Attend:

This course would be particularly relevant for officers who are responsible for leading military operations, providing legal advice, or making decisions that have legal or ethical implications. The course is also suitable for officers who are preparing for roles in which they will be responsible for ensuring compliance with legal and ethical standards, or who simply want to deepen their understanding of the legal and ethical frameworks that underpin military operations.

## Learning Outcomes

- Develop a deep understanding of the legal frameworks that govern the use of force in military operations, including the principles of international humanitarian law, human rights law, and domestic law.
- Understand the ethical principles that guide military decision-making, including the importance of respecting human dignity, minimising harm, and balancing competing priorities.
- Develop practical skills in decision-making and leadership in complex and challenging environments, including the ability to assess legal and ethical risks, identify options, and make informed choices.
- Understand the responsibilities of military commanders in ensuring compliance with legal and ethical standards, including the duty to protect civilians and the duty to ensure the well-being of subordinates.
- Develop an awareness of the cultural and contextual factors that can impact legal and ethical decision-making in military operations, and learn how to navigate these complexities in a responsible and effective way.

## Strategic Management in Defence

This course is designed to provide senior military officers with the skills and knowledge they need to manage complex military operations and strategic planning processes effectively. This course will cover a range of topics related to strategic management, including organisational design, resource allocation, risk management, and decision-making. Participants will learn how to develop and implement effective strategies, manage competing priorities, and navigate complex stakeholder relationships. The course will also cover emerging trends and challenges in the field of defence, including the impact of technology, changing geopolitical dynamics, and evolving security threats. By the end of the course, participants will be equipped with the skills and knowledge they need to lead strategic planning processes, develop effective strategies, and manage complex military operations in a rapidly changing global environment.

### Who Should Attend

This course is designed for officers who are seeking to enhance their strategic management skills and knowledge, with a focus on developing and implementing effective strategies that align with organisational goals and objectives. Participants should have a strong background in military operations and planning, as well as a desire to learn and develop new skills to meet emerging challenges in the field of defence.

## Learning Outcomes

- Develop skills to manage complex military operations and strategic planning processes more effectively.
- Understand the importance of organizational design, resource allocation, risk management, and decision-making in strategic management.
- Gain knowledge and tools to develop and implement effective strategies that align with organizational goals and objectives.
- Enhance stakeholder management skills, including the ability to build and maintain relationships with diverse stakeholders such as government officials, military partners, and non-governmental organizations.
- Develop a deeper understanding of emerging trends and challenges in the field of defence, including the impact of technology, changing geopolitical dynamics, and evolving security threats.

## Creativity and Innovation Design Thinking for Military Leaders

This course is designed to equip senior military officers, with the tools and strategies needed to foster creativity and innovation within their organisations. This course will provide participants with a comprehensive understanding of design thinking methodologies and how they can be applied to military contexts. Through a combination of lectures, case studies, and interactive exercises, participants will develop practical skills in ideation, prototyping, and testing, and learn how to apply these skills to solve complex challenges facing their organisations. By the end of this course, participants will be able to apply design thinking principles to develop innovative solutions to real-world problems, and lead teams in a way that fosters a culture of creativity and innovation.

## Who Should Attend

This course is designed for senior military officers, who are interested in learning how to apply design thinking principles to drive innovation and solve complex problems in their organisations. This course will be particularly relevant for military leaders who are looking to enhance their strategic and creative thinking skills, and who are interested in fostering a culture of innovation within their teams and organizations.

## Learning Outcomes

- Develop a deep understanding of design thinking principles, and how they can be applied to military contexts to drive innovation and solve complex problems.
- Learn how to identify and frame problems, and generate creative solutions using ideation techniques such as brainstorming and mind mapping.
- Develop practical skills in prototyping and testing, and learn how to use rapid prototyping techniques to iterate on ideas and refine solutions.
- Gain an understanding of the importance of user-centric design, and learn how to conduct user research to gain insights into the needs and preferences of end-users.
- Develop the skills needed to foster a culture of creativity and innovation within their organisations, and lead teams in a way that encourages experimentation and risk-taking.

## Executive Coaching for Senior Military Leaders

We understand the unique challenges that come with transitioning from a military career to the corporate world. Our Executive Coaching service is tailored to equip senior military officers with the necessary skills, knowledge and support required to excel in their new roles.

Our experienced coaches have extensive corporate backgrounds and a deep understanding of the military culture. We provide a safe and confidential environment for our clients to discuss their concerns, aspirations and goals. Our coaching sessions are personalised and designed to help clients identify their strengths, weaknesses and areas for improvement.

Through our programmes, senior military officers will gain a comprehensive understanding of the corporate landscape, learn effective communication and leadership strategies, and develop their professional network. We offer ongoing support and guidance to ensure a smooth and successful transition into the civilian workforce.

We are committed to empowering senior military officers to achieve their full potential in their new careers. We look forward to partnering with you on this exciting journey.

# Future Skills Leadership Lab

The Future Skills Leadership Lab is designed specifically for senior military officers transitioning to the new world of work. We understand that the future of work is rapidly evolving, and leaders need to be equipped with new skills and knowledge to adapt to these changes.

Our Lab is designed to provide senior military officers with the skills and tools required to lead in the new world of work. Our experienced facilitators have extensive knowledge and experience in the latest trends and technologies impacting the future of work. We provide a safe and collaborative environment for our clients to learn, experiment and practice new skills.

Through the various experimental lab sessions, senior military officers will gain a comprehensive understanding of the latest trends and technologies impacting the future of work. They will learn new skills such as design thinking, agile project management, and digital transformation. They will also have the opportunity to collaborate with peers and experts in the field, developing their professional networks.

We are committed to empowering senior military officers to lead effectively in the new world of work. We believe that by developing the necessary skills and knowledge, leaders can drive innovation and create a more resilient and successful future. We look forward to partnering with you on this exciting journey.

Senior military leaders must continue to invest in their personal leadership development journey. A journey that ensures they remain relevant, to the environment in which they operate, be it strategic or commercial, and most importantly, to their people.

Global Strategy Fellow LSC

# Our Locations

## Delivery Centres

### Sandhurst Military Academy

Located in the heart of Berkshire, the Sandhurst Military Academy is renowned for its historic significance and excellence in military training. Here, participants will immerse themselves in a prestigious environment that has shaped military leaders for generations.

### Arab and British Chamber of Commerce, Mayfair London

Situated in the exclusive Mayfair district of London, the Arab and British Chamber of Commerce offers a sophisticated setting for our programs. This location provides a unique blend of traditional British charm and modern facilities, ideal for strategic and leadership courses.

## Other Centres

### Wyboston Lakes Resort

Located in Bedfordshire, Wyboston Lakes Resort provides a tranquil and conducive environment for learning. Its state-of-the-art facilities and serene surroundings make it an excellent location for focused training sessions.

### Science Museum, London

The Science Museum in London offers a dynamic and inspiring setting for our courses. Participants will have the opportunity to learn amidst exhibits showcasing the latest in technological innovation and scientific discovery.

## Graduation

### House of Lords, London

Our program culminates in a prestigious graduation ceremony at the House of Lords in London. This iconic location provides a grand and historic backdrop, underscoring the significance and accomplishment of completing our leadership programs.

## Exclusive Dinners

### Tower of London

The London Strategy Centre is privileged to offer our clients an exclusive dining experience at the Tower of London. This unique event provides a rare opportunity to dine in one of the most historic and iconic landmarks in the UK.
